

How to Configure Envato Integration for Easy Digital Downloads Plugin

Last modified: June 14, 2016

1. Get your Envato personal token. Go to <https://build.envato.com/my-apps/>. Under "Your personal tokens" section, click "Create a new token". A new form will appear. Fill out the form. Enter any name for your token and choose the required permission like this:

Token name

Pick something cool, short and catchy!

Permissions needed

- ☐ View and search Envato sites
- ☐ View your Envato Account username
- ☐ View your email address
- ☐ View your name, location and account balance
- ☐ View your account financial history
- ☐ Download your purchased items
- ☒ View your items' sales history
- ☒ Verify purchases of your items
- ☐ Verify purchases you've made
- ☐ View your purchases of the app creator's items
- ☐ View your public and private collections
- ☐ List purchases you've made

Click to Enlarge

The required permissions are "View your items' sales history" and "Verify purchase of your items". Then check I agree to TOS and click create token.

2. Enter personal token. Copy your personal token and paste it to Personal Token field under Downloads > Settings > Extensions > Envato Integration on your WordPress website. And then click "Save Changes".
3. Enter Envato product ID. Enter your Envato product ID that you want to associate with an EDD download to EDD download metabox. Edit an EDD download and find a metabox field like this to enter your Envato product ID. Envato product ID is unique number that represents your product on Envato marketplaces. For example a CodeCanyon product URL
